

PMC Medicare Choice receives Quality Accreditation from NCQA

PMC Medicare Choice (PMC) and its sister company Medicare y Mucho Más (MMM) have always placed quality as a priority in everything they do for the benefit of all their members. Each initiative, program and effort is in benefit of the member and that's why the Accreditation recently received by the National Committee for Quality Assurance (NCQA) is so important.

After much effort to optimize its services, MMM and PMC received Commendable Accreditation from NCQA. It is the first time this organization gives Quality accreditation to health plans in Puerto Rico and it's truly a historic moment for all health services in the country.

NCQA is a non-profit organization that strives to optimize the quality of healthcare services using the most rigorous accreditation standards in the entire nation. Achieving **Commendable Accreditation** is a sign that the health plan has quality as a top priority.

NCQA standards are designed to encourage organizations to reach the highest possible performance levels, reduce risks for patients and promote an environment of continuous improvement. This accreditation is a sign of our commitment to always give everything for our members.
